SOFTWARE ENGINEER

Ankara, Türkiye • utkumese.dev@gmail.com • linkedin.com/in/mehmet-utku-mese • github.com/Utku-Mese • utku-mese.github.io

PROFILE

Software engineer with 4+ years of product development experience across mobile, backend and IPTV systems. Currently working at NETAŞ on the Tivibu IPTV portal, with a focus on usable interfaces, maintainable architecture and performance in constrained environments. Experienced in Flutter, native mobile development, JavaScript, Java EE and service integrations.

EXPERIENCE

Software Engineer

2025 - PRESENT

NETAŞ - Ankara, Türkiye

Developing the set-top box portal layer of Tivibu IPTV, a large-scale television platform serving live TV, VOD and time-shifted experiences.

- Build and maintain portal features including EPG, channel navigation, player controls, search, PPV, parental controls, self-care and messaging.
- Integrate HLS/DASH streaming, Widevine and Verimatrix DRM, REST services and ZTE middleware APIs using JSP, Java EE, JavaScript, HTML and CSS.
- Improve responsiveness and stability for resource-constrained set-top box hardware.

Software Development Specialist

2024 - 2025

BDH / NETAŞ ecosystem - İstanbul, Türkiye

Delivered enterprise mobile products for field and warehouse teams while contributing to backend services and technical documentation.

- Built Flutter and Ionic workflows for work orders, inventory, barcode printing, cargo acceptance and operational tracking.
- Applied GetX, BLoC, MVC/MVVM, REST APIs and ZPL integrations across Zebra devices and printers.

Mobile Developer Intern

JUL - SEP 2024

Intellium - İstanbul, Türkiye

Rebuilt an internal web portal as a cross-platform Flutter application released for Android and iOS.

- Integrated .NET REST services with GetX state management and served as Scrum Master during the final sprint cycle.

CORE TOOLKIT

PRODUCT & MOBILE

Flutter, Dart, Kotlin, Swift/SwiftUI, React, Material Design

TV & WEB

JavaScript, JSP, Java EE, HTML/CSS, HLS/DASH, Widevine, Verimatrix

SERVICES & DATA

Spring Boot, Node.js, REST APIs, WebSocket, MongoDB, Firebase, SQL

PRACTICES

Clean Architecture, SOLID, MVC/MVVM, BLoC, GetX, Scrum, Git

Mehmet Utku Meşe

SELECTED WORK & BACKGROUND

SELECTED PROJECTS

Naviscope

FLUTTER / GNSS / OPEN SOURCE

A mobile location-health dashboard that visualizes fix status, accuracy, satellite signal strength, skyplot geometry and live telemetry. Android combines native GNSS data with fused location flows; iOS uses CoreLocation within platform limits.

github.com/Utku-Mese/naviscope

Bisevk (formerly Yükümü Al)

FLUTTER / SPRING BOOT / LOGISTICS

A mobile and web freight marketplace connecting load owners and carriers. The product supports listings, offers, messaging, notifications, location flows and scalable REST/WebSocket integrations using Flutter, BLoC, React, Kotlin, Spring Boot and MongoDB.

View on the App Store

Emptor Mobile

ENTERPRISE MOBILE

A modular field-operations product for work orders, inventory requests and process tracking. Contributed to modernizing the Ionic application into Flutter with GetX, REST APIs, ZPL support and maintainable MVC-based modules.

BoxCoder & Cargo Acceptance

INDUSTRIAL TOOLING

Flutter applications for warehouse operations: bulk barcode printing over Bluetooth to Zebra printers, camera/device scanning, delivery documentation, product sorting, history tracking and operational expense flows.

Portal Intellium Mobile

ANDROID & IOS

A mobile adaptation of an internal company portal, built from the ground up with Flutter, GetX, REST APIs and a .NET backend, then delivered across Android and iOS.

EDUCATION & RECOGNITION

B.Sc. Software Engineering

FIRAT UNIVERSITY - 2021 - 2025

GPA: 3.27 / 4.00

NASA Space Apps Challenge

2022 WINNER

Won first place with the team project Wink To The Future.
